## **ABSTRACT**

### **TWO TIERS PANEL RUBBERWOOD SIDE TABLE**

The objectives of this study are to create a design of two-tier side table by using panel rubberwood as a raw material and to evaluate the customer satisfaction through questionnaire survey. The globe is presently faced with a lot of important challenges as a result of demographic expansion and resource constraints. Since to overcrowding in the living region, such as a major city, people are forced to live in small spaces such as flats or apartments. As a result of all of these difficult difficulties, two tiers furniture has evolved as one of the solutions to the problem of space efficiency. Two tiers furniture integrates many functions into a single piece to save material consumption and at the same time saving the user space. To overcome these issues, a design for a two tiers panel rubberwood is produced. The chosen responder is given a set of questionnaires to provide feedback and comment based on the design provided. According to the study's results, respondents agree on the factors of material, design, marketing, and product satisfaction. Most responders agreed with the product design.

## ACKNOWLEDGEMENT

Assalamualaikum wbt.

Alhamdulillah, first, I would like to thank Allah S.W.T the Most Gracious, the most Merciful for give me the health of physical, and mental strengthens in completing my research. Millions of thanks to my project Coordinator, Dr. Siti Zalifah binti Mahmud for all her guidance and support.

I also would like to express my special thanks to my supervisor, Puan Junaiza binti Ahmad Zaki, who was willing to give her knowledge and sacrifice her time and show me the best way to complete my thesis. I would like to thank all my lecturers, my friends and staff of the wood industry department, who helped me a lot either directly or indirectly. Thank you for all your support and assistance

In the end, I would like to express thankful to my beloved family, especially my mother, for their endless moral and financial support to complete my study and my thesis. Not forgotten, my sibling and friend especially who have supported and help me in during my studies. Thanks to their faith and support as I can be who I am.

Muhammad Fazli bin Rosaidi
