ABSTRACT

The study was carried out on MeHDA with regards to the readiness of change among e-hailing drivers in Klang Valley. The role of MeHDA is to help, support, and protect the e-hailing drivers’ rights. This is especially needed when the government has decided to enforce the conditions for e-hailing drivers at the same level as taxi drivers in which the e-hailing drivers do not have the readiness to change. This is because too much cost needs to be borne, especially for part-time e-hailing drivers. In 2019, there was a shortage of e-hailing drivers around 20% to 50% due to the newly imposed government rules and regulations. This research aimed at studying on the readiness to change among e-hailing drivers in Klang Valley. It specifically focused on e-hailing drivers around Klang Valley area. This study adopted a descriptive analysis as its research method and convenience sampling as its sampling technique. This research was based on data obtained from a survey that inquired e-hailing drivers’ responses regarding their readiness to change. The data were then analysed to examine the relationship of readiness to change among e-hailing drivers in Klang Valley. The findings of this study showed that as independent variables (IV), process of change and work engagement were significantly influenced by the dependent variable (DV), i.e., readiness to change. Meanwhile, trust in management and organisational commitment as IV was not significantly influenced by the DV, i.e., readiness to change. Therefore, the findings revealed that process of change is the most prominent factor that impacts readiness to change among e-hailing drivers as its beta value was the highest compared to other independent variables.
ACKNOWLEDGEMENT

Firstly, we would like to thank God for giving us the opportunity to embark on our Masters and for completing this long and challenging journey successfully. Our gratitude and thanks go to our supervisor, Prof. Dr. Norlida Abdul Hamid. Thank you for the support, patience, and ideas in assisting us on this project. We also would like to express our gratitude to the President of MeHDA, Mr. Daryl Chong, for providing us information.

Special thanks to our colleagues and friends for helping us on this project. Finally, this thesis is dedicated to the loving memory of our parents for their vision and determination in educating us. This piece of victory is dedicated to both of you.

Alhamdulillah.

## CHAPTER ONE: INTRODUCTION

1.1 Preamble                                                           1
1.2 Background of Study                                               1
1.3 Background of Industry                                            2
1.4 Background of Association                                         3
1.5 Statement of the Problem                                          5
1.6 Research Objectives                                               7
1.7 Research Questions                                                8
1.8 Scope of the Study                                                8
1.9 Significance of the Study                                         8
  1.9.1 Researcher                                                     8
  1.9.2 Organisation                                                  9
  1.9.3 The Body of Knowledge                                         9
1.10 Definition of Terms                                              9
  1.10.1 E-hailing                                                     9
  1.10.2 Readiness to Change                                           9
  1.10.3 Trust in Management                                          9
  1.10.4 Process of Change                                            10
  1.10.5 Organisational Commitment                                    10
  1.10.6 Work Engagement                                               10
CHAPTER TWO: LITERATURE REVIEW

2.1 Preamble

2.2 Background of Research Area

2.3 Concepts and Definitions of Key Components of the Research Area

2.3.1 Readiness to Change

2.3.2 Relationship between Trust in Management with Readiness to Change

2.3.3 Relationship between Process of Change with Readiness to Change

2.3.4 Relationship between Organisational Commitment and Readiness to Change

2.3.5 Relationship between Work Engagement and Readiness to Change

2.4 Research Framework

2.5 Business Tools

2.5.1 SWOT Analysis

2.5.1.1 Strengths (internal)

2.5.1.2 Weaknesses (internal)

2.5.1.3 Opportunities (external)

2.5.1.4 Threats (external)

2.5.2 TOWS Matrix

2.6 Academic Construct

2.7 Summary

CHAPTER THREE: RESEARCH METHODOLOGY

3.1 Preamble

3.2 The Research Design

3.2.1 Purpose of Study

3.2.2 Extent of Research Interference

3.2.3 Study Setting

3.2.4 Unit of Analysis

3.2.5 Time Horizon

3.3 The Sampling Design

3.3.1 Target Population

3.3.2 Sample Size

3.3.3 Sampling Technique

3.4 Instrument
